hello@chael.codes • +(1) 678-538-7850 • <https://chael.codes>

Experienced Ruby/Rails developer with unique experience in live-streaming, conference talks, and open-source contributing looking for an interesting opportunity to develop my skills. I have extensive experience with billing systems including sales tax, internationalization, customer invoicing, and integrations including stripe, braintree, chargebee, and avalara.

## Work Experience

### Content Creator/Maternity Leave August 2023-Present

- Spoke at Blue Ridge Ruby, guested on 5 podcasts
- Collaborated with GitLab's Community Coders team

### Calendly React/Ruby/Rails • August 2021-August 2023

- Worked on Calendly's pricing changes
- Led the Developer Portal project for the API squad

### New Relic Sr. Developer Relations Engineer • December 2020-August 2021

- Organized events including New Relic's 24hr stream, Nerd Island track at Futurestack, and Ruby Galaxy
- Co-hosted the Polyglot podcast

### Calendly React/Ruby/Rails • February 2020-December 2020

- Led the sales tax project - integrating with Avalara
- Worked on integrations with Paypal and Chargebee

### Women Who Code React/Ruby/Rails • December 2018-February 2020

- Backend Lead developer for entire site

### CallRail Angular/Ruby/Rails • January 2017-November 2018

- Team lead of "Don't Lose" and Billing, mentored apprentices
- Made existing invoicing more robust and built out international charges
- Led and architected company invoicing

### Other Roles June 2011-December 2016

- Built out inpatient lab and radiology solutions for AthenaHealth
- Built integrations for Macy's General Ledger and Accounting Applications
- Built sharepoint sites and solutions for internal Macy's teams
- Taught middle schoolers LEGO mindstorms and Jython at GGC Tech Camp
